# Trentoniana Archive Project++

Raymond Chow, Alexander Viola, Alexander Benasutti, Sam Haseloff

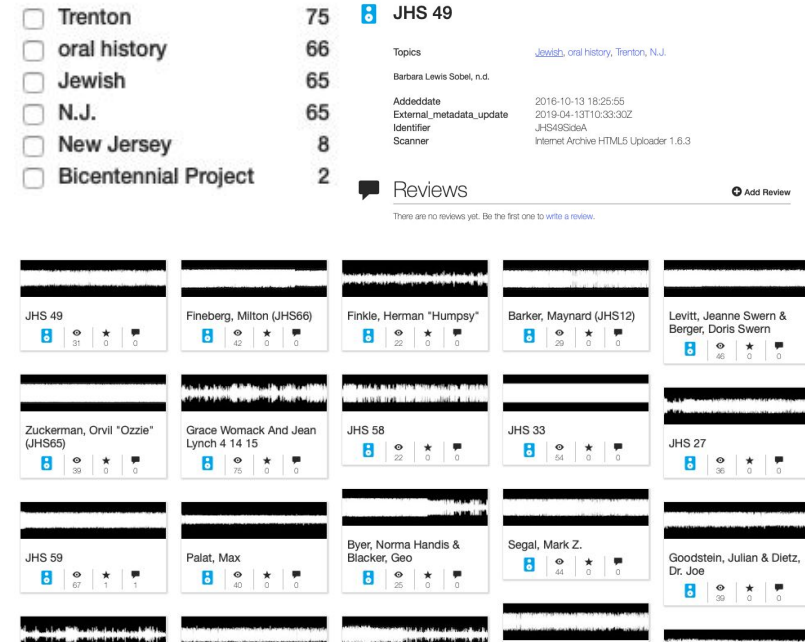

Group 11

# Need and Approach

→ The Trentoniana archive of audio recordings is disorganized

→ Objective

- ◆ Provide an easy-to-use interface accessible to all types of users
- ◆ Clearly present transcripts beside audio files

The screenshot displays a web interface for the JHS 49 project. On the left, a sidebar lists categories with checkboxes and counts: Trenton (75), oral history (66), Jewish (65), N.J. (65), New Jersey (8), and Bicentennial Project (2). The main content area shows details for JHS 49, including a topic link to 'Jewish, oral history, Trenton, N.J.', metadata (added date, external metadata update, identifier, scanner), and a 'Reviews' section with an 'Add Review' button. Below this is a grid of 15 smaller item cards, each featuring a waveform, title, JHS number, and a set of icons for audio and transcript availability.

Item	JHS Number	Audio	Transcript
JHS 49	31	0	0
Fineberg, Milton (JHS66)	42	0	0
Finkle, Herman "Humpsy"	22	0	0
Barker, Maynard (JHS12)	29	0	0
Levitt, Jeanne Swern & Berger, Doris Swern	46	0	0
Zuckerman, Orvil "Ozzie" (JHS65)	39	0	0
Grace Womack And Jean Lynch 4 14 15	75	0	0
JHS 58	22	0	0
JHS 33	54	0	0
JHS 27	36	0	0
JHS 59	67	1	1
Palat, Max	40	0	0
Byer, Norma Handis & Blacker, Geo	25	0	0
Segal, Mark Z.	44	0	0
Goodstein, Julian & Dietz, Dr. Joe	32	0	0

# Benefits and Cost

## → New Features

- ◆ Transcript display
  - User edit requests
- ◆ New administrative functionality
  - Audio file and transcript revision at will
  - Instant access to audio files
- ◆ Better UI

## → Cost

- ◆ Initial setup process
- ◆ A \$5 server is enough
